Energy and Water Saving Top Tips

Small changes can make a big difference to how much energy and water you use! Helping you to play your part in reducing water use, CO2 emission and reducing your bills. How much could you save?

Switch to a shower – a shower uses less water and less energy than a bath and by reducing your shower by a minute a day you can save **£7* a year.**

Fit a water efficient shower head and save **£45* pa**

Only fill a kettle with the amount you need and save **£6* per year.**

Use the Eco setting on washing machines and dishwashers and save **£6* per year**

*Energy saving statistics are from the Energy Saving Trust
